REVENUE BRANCH.

OFFICE NOTE.

SUBJECT. Repairs and maintenance of minor Tanks

LAST REFERENCE. Letter No. 4559 dated 7th September 19
from the Chief Engineer of Mysore.

Vide Letter No 82.
(Paper No 17).

The Deputy Commissioner Tumkur District, has solicited instructions as to whether the orders in regard to the annual maintenance of minor Tanks by the Ryots contained in the Tanks have been brought up to Standard & formally handed over

to them for safe keeping, can be held applicable to those not brought safe to standard, and not handed over to them, the question was referred for opinion to the Civil Engineer, who in reply forwards 2 copies of circulars on the subject issued in the year 1878, and states that they do not appear to have been rescinded. These circulars enjoined Revenue officers to speak themselves to instruct the Ryots to maintain all minor Tanks whether restored or not in as complete a state of safety & efficiency as possible. Col: Bonus says that this

Vide No 3180 (Paper No 18) R 286

Vide No 4639 dt 7-9-94.

Paras 1 & 2 Circ: No 12 & 1 Circ: No 13.

to such lands as are
specially or otherwise
by situation near a Railway
line as important, and
they must be kept
up to a standard of height
independently of the
Rayots' obligations
above specified -

(4). The maintenance
of such lands
as have been brought
up to land and by the
and handed over to
Rayots further upon
devolves upon them
& should be strictly
enforced under the Rules
of the 2nd Oct. 1873
These rules anticipate
the work of a responsible
Rayot to be carried
out by the Village Patel
and the cost re covered
as a Revenue arrear
These rules should be
strictly enforced -

(5) With regard to all the
New lands all the

Revenue authorities should endeavour to make the annual maintenance done by Rajahs. Such endeavour will be by using their reasonable influence and persuading the Rajahs to do what is expected of them, and what in the long-run will prove to their own interest Coercive measures are not necessary and cannot now be sanctioned.

(6) Complaints in the disposal should be carefully inspected once a year and the result of the inspection recorded in a register to be kept for the purpose. Rules 8 to 12 of the Rules above referred to are not strictly complied. The attention of the Collectors should be called to these rules and their strict enforcement strictly enjoined.

I shall be obliged if Col Bowen

The minute above embodies my opinion on the General subject, but I believe the "influence" of the Revenue authorities is not sufficient to "induce" the ryots to execute voluntarily timely repairs to the vast number of small tanks that dot the country. I fear but little has been done or is being done to such tanks, notwithstanding our permission to do the standards & necessary at first cost, when the ryots find done or commenced to do the 'Earthwork & Turfing' to any tank. Therefore I suggest for the consideration of Government the issue of an order empowering the Revenue officers to carry out maintenance work to minor tanks, recovering cost as a Revenue demand — just as is done in the case of major & other Notified tanks formerly "handed over to the ryots" unless this is done, or unless Govt undertake the gradual restoration & permanent maintenance of all Tanks, major & minor, deterioration & final collapse must go on — the latter alternative no doubt a formidable & expensive undertaking.

for the subject together with an explanation of his inattention to the Chief's Engineer's requisition concerning the tanks, was called for from the Dy. Comr. Vide this office No. 6905 dy 6.3.01. No reply has been received from the Dy Comr. as yet. A reminder (No. 2390 RT.286-92) has also been sent to the Dy Comr. on 17.4.01.

Serial No. 28.

— do — 29.

4. In his letter No. 2028 dated 20.4.1901, the Chief Engineer solicits early orders on the suggestion made by him. Vide the last portion of the 2nd para above.

Serial No. 30.

5. The Chief Engineer also reports, in his letter No. 2247 dy 22.4.01, that the bund of the Mandya large tank, Regd No 14, Mandya Taluk, has been allowed

Serial No. 31.

II

allowed to deteriorate, that the Dy. Comr., who was asked to obtain the explanation of the Amildar, has forwarded the explanation and states that it cannot be accepted as satisfactory. In his explanation the Amildar states that earth-work as specified in the margin was done by the ryots to the tank and that the earth used for the purpose not being good, it was washed away by the rain year after year down the rear slope of the bund into the side drains of the Mandya-Basral Road, from where it is being removed every year to the other side of the drain by the P.W.D.

The Chief Engineer is of opinion that the Amildar and his predecessors who were in charge of the tank since 1883, the year in which

the

1893-94 ... Rs 66-0-0
1894-95 }
1895-96 } ... 1419-6-0.
1898-99 ... 113-8-0
1899-1900 ... 121-0-0.
1724-14-0

the tank was erected, and who allowed the bund to deteriorate to its present deplorable condition, to the dangers of the Railway lie immediately below, deserve the special censure of Government. He also that the earth-work required to bring the bund to standard will now be carried out by the P. W. D., for recovery from right as a revenue demand, as it is absolutely necessary that this important tank should be put into a state of safety at once, and that it seem necessary that stringent orders should issue to the Dy Comr in view to the maintenance of this important tank being strictly insisted upon in future.

The Committee may consider this question.

Serial No. 32.

6. A third case of the same sort is brought to the notice of Govt by the Chief Engineer in his letter No. 2379 of 29. 4. 01. The Bhadram tank in the

Vidlaghatta Taluk of the Kolar District has not been properly maintained. The bunds have fallen into disrepair, the ryots not even clearing silt from them and have breached heavily in a few places. The tank and its channels were improved at an outlay of Rs 22,427 in 1838 and a revenue of Rs 6000/= (or an increase of Rs 5000/= over the previous revenue) was expected therefrom. The Chief Engineer addressed the Dy Comr on the subject in April 1893 and sent a reminder also in January 1894 but the Dy Comr has not replied as yet. An estimate for Rs 6,923/= for repairing the channels of the tank, of which Rs 2,472/= is the cost of earthwork, has been sanctioned by the Chief Engineer, as the ryots have failed to carry out the maintenance

work

within the three years that have elapsed since the reference made to the Govt & as it was inadvisable to allow these important channels to remain in their present unsatisfactory State. The work has been ordered to be carried out under the maintenance rules, debiting cost to Revenue Department for recovery as a revenue demand. The Chief Engr requests Govt to take such notice as they may wish —

(1) of the neglect of maintenance of these important channels, on the improvement of which Govt have spent Rs 6,437/- when restoring the tanks in 1888;

(2) of the failure of the Revenue Department to enforce the maintenance rules

rules, though that neglect was specially brought to the notice of the Dep Comr in 1898;

and (3) of the want of interest evinced by that Department, in securing the increase of revenue, which after the lapse of 12 years since the Tank and channels were improved, is only Rs 1,371/- against about Rs 5000/- anticipated.

The Chief Engineer also solicits sanction to the entertainment of a Maneger on Rs 10/- per mensem for the proper conservancy of the channels which are nearly 6 miles long. and states that this appointment is considered necessary both by the Executive

This is taking an entirely new view of the whole question. I think Commissioner said about this in the course of evidence given before the Irrigation Commission.

This may be sanctioned

[illegible] 17.8.99

of adopting the course of empowering the P.W.D. to carry out maintenance work in cases in which owners fail to carry out work after lapse of notice served on them. Vide last portion of para 1 above.

Re Cards, do not permit this. It is a misnomer for all maintenance work

Submitted to the Secretary for orders -

have not been, by their neglect
or ignorance by New Officers
Now Officers if still in an accountable
position in the service they ought

to Treasury, 1873

Sir, I have the honor to transmit herewith a communication from the Secretary of the Treasury, dated the 18th instant, with enclosures, relative to the claim of Thomas Hunt & Co. for duties paid on goods destroyed by the fire of October 9th, 1871, in the city of Chicago, and to request that the same may be referred to the Committee on Ways and Means.

Very respectfully, your obedient servant,

[illegible]

Speaker of the House of Representatives.

Referred to the Committee on Ways and Means, and ordered to be printed.

March 19, 1873

Arrs
24/5

The question is not so clear as the Dewan would seem to think. It is in my opinion extremely difficult of solution as an important principle is involved in it. It is no other than whether under the Notification of 1873, the ryots can be held responsible for the cost of repairs to a tank which in some instances means not petty earth work costing a few hundred

hundred rupees but
practical restoration
of the tank costing
from to 6000 Rs.
No doubt if the annual
maintenance had been
attended to, the tanks
would not have de-
teriorated to the extent
which necessitated the
incurring of a large
outlay but the Notifica-
tion under which
we propose to proceed
contains penal provisions
which cannot be enforced
unless the formalities laid
down in them had been
observed by the Government
and

and
village officers on whom
certain duties are
imposed.

It is the duty of
the Patel and Shikdar
to assign the work to
be done by the ryots,
and the periods at
which the repairs shall
be done are also to be
fixed by the village
authorities. Consequently
as long as there has
been no requisition
on the part of the
village authorities, it
cannot be said that
the ryots have been in
default.

default.

Secondly, the work which the ryots are bound to do under the rules as "tank maintenance" is defined in Rule 4 as consisting of "ordinary earth and turf work repairs of every description". It cannot be said that extraordinary repairs due to the accumulated neglect of years, and amounting really to the restoration of the tank, fall under the above definition; and for the cost of such works, therefore, the ryots

cannot

maintaining the work
in repair, a duty which
has not long been strictly
enforced, and which
certainly ceased al-
-together on the recent
introduction of an
irrigation cess in express
commutation of it"
(vide minute by the
Chief Commissioner of
Mysore dated 13th August
1878).

Also opinions are
divided as to whether
in the first place the
Notification of 1873 has
the force of law.

I have endeavoured however not to allow these legal defects to influence my action and have proceeded upon the assumption that the rules are enforcible but have endeavoured to temper their application whenever it appeared to me that their strict enforcement would cause hardship. If the Dewan wishes me to follow the precedent in the order passed by Government in Proceedings No 3035-43/ Pet 452 dated 11th October 1900 all

I have endeavoured to take every precaution to see that the St. Louis Exhibition & other Officers do not neglect their duties and to prevent 1893 the [illegible] [illegible] [illegible]

this is not the place to enter into the details of the question.

I have noted my remarks against each case.

Rec 12/8/94

No 82

Tumkur District
Deputy Commissioner's office
Tumkur 21st July 1894

To

The Chief Secretary to the
Government of Bellgaum

Sir,

In para 3 of Government
Order No. 2278-81 (SNo 15) of the 22nd June 1894,
R-H 286-92
it has been ruled that in the case of
minor tanks the ryots' duty in regard to
annual maintenance should be duly
enforced. If the ryots fail to do the
annual maintenance work to tanks
brought to standard (whether major
or minor) such work may be got done
and the cost recovered as a revenue
demand as per Notification No 65 (SNo 1) of
Pa. 6 - the 2nd October, 893. But no such
authority is given in the case of tanks
not yet brought to standard, and yet

in the order above quoted it has been stated that the ryots duty in regard to the annual maintenance should be duly enforced. If the order refers only to tanks brought to standard then it is all right. But if it also refers to minor tanks not brought to standard then authority will have to be given to have the maintenance work done and the cost recovered like a revenue demand whenever the ryots fail to do the work voluntarily. I have made this reference because an officer has in the execution of the order in question, had to seek instructions in the matter.

I have the honour to be
Sir
Your most obedient servant

To

The Chief Secretary to the
Government.

Sir,

R 788

In connection with the Order No. 1633 dated 14th August, regarding the maintenance of Main Roads by Depts, I have the honor to forward for information, copies of the correspondence noted in the margin on the subject.

1. P. W. Secretary Circular No. 2 dated 4th August 1893.
2. Chief Engineer Circular No. 3 dated 2nd August 1893.

Pencil Copy Corrected

Some delay has occurred in the Public Works Department in getting which do not appear to have been received. The Circulars require Divisional Officers to select Maintenance Lengths of Main Roads, entered in detail, to be completed & classified and Officers responsible. This has not been sufficiently attended to. Unless Engineers under the Maintenance rules of 1892 are given, in the case of Roads that have been brought

brought up to Standard size promptly
hereafter; but not to require
corrected Work until such time,
as there is no danger to have the
Contractors work done and the last
allowed bill a reserve Estimate after
the Right first has been Patented.
And it is obviously necessary that such
Work should be maintained in a
Complete & state of efficiency in order
that they are taken up under the Act.
Should Circumstances render it expedient
for the Engineer in Chief to order
Work in addition to the Contract
work, returning Estimate as a Separate
Bill in the Case directed Work.

The Secretary to Govt of Mysore,
General & Revenue depts.

(26)

SIR,

With reference to Govt. Proceedings No 3355-
/Rev. 252. dated 3rd October 1890. I have the hon
to report the following Case, in such action a
Govt may consider necessary to take in the
matter, as the neglect on the part of the Revenue
Department to enforce the Maintenance Rule.

2. In 1889, the Tahsildar of Nagar Taluk in Shimoga
District, was vested by Govt. of an outlay
of Rs 2000, and handed over to the Revenue Depart-
-ment for future maintenance by Supt. under
the Executive Order of 1873.

3. In October 1892, the Executive Engineer inspected
the tank and reported that "the present condition
"of the bund is anything but satisfactory. Not-
"even a single cubic foot of earth appears to
"have been put upon it since it was handed over.
"The front and rear slopes are terribly cut-
"up into gullies, and the grazing of the cattle does
"not seem to have been prohibited at all. In
"some places, rain water has worked behind
"the revetment and caused the earth to slip
"badly, resulting in settlement of slopes.

bund in places is less than 9 yard in width, though the sanctioned and excavated width is 9 feet. In the cuttings, for a length of 5 grade bund is from 3 to 4½ feet above grade level. Cart is not allowed to pass, as cattle gaps in the bund fencing are. Unless immediate steps are taken to make the bund to sanctioned details originally adopted, it may not be unlikely that the bund would be in danger in heavy rainfall years.

4. In sending up the Inspection note, the Supdg. Engineer suggested that with a view to punish the ryots concerned, and to set an example to others, the bund be repaired by Contract, & cost recovered from ryots through Revenue Department. -

5. In this office No. 162 dated 22nd November 1913, with which copies of above correspondence were sent & Deputy Commissioner was asked to submit, for information of Government such explanation as he may be able to offer as regards the total neglect of maintenance brought to notice, and as to why the maintenance rules were not enforced in this case, and what notice he proposes to take of the dereliction of duty on the part of the Revenue Officials. He was also asked to state whether he has any objection to the adoption of Supdg. Engineer's suggestion to carry out repairs by P.W.D. department, recovering cost from ryots,

MYSORE P. W. DEPARTMENT.

No. 2377 BANGALORE, 29 April 19

From Chief Engineer
THE ~~SECRETARY TO THE GOVT.~~ OF MYSORE,
P. W. DEPARTMENT.

To The Secretary to the Government of Mysore, General and Revenue Department.

SIR,

I have the honor to report that the Kadaram tank and its channels in Nidagkatta Taluk, Kolar District, were improved by Government at an outlay of Rs 22,427/- in 1888, and a revenue of Rs 6,000 was expected from such improvement, or an increase of about Rs 5,000/-.

II In his inspection note of 14th April 1898, the Superintending Engineer Eastern Circle brought it to notice that there had been no appreciable increase of revenue, owing to the channels having fallen into disuse (the Ryots did not even clear silt from them) and being traversed heavily in a low place - a copy of this report was sent to the Deputy Commissioner

Executive Engineer with this office No. 229
dated 20th April 1898 and he was
asked to furnish any explanation
he may have to offer in connection
of Government, (1) as to why the
maintenance rules in this case were
not enforced, (2) why the necessary
maintenance work should not be
carried out at once by Government
and not recovered as a revenue
demand from defaulting Ryots;
and (3) to state the real cause
of there being no appreciable increase
of revenue, present revenue being
roughly Rs 3,000/- whereas the total
expected revenue was Rs 6,000/- No
reply has yet been received from
the Deputy Commissioner although
a reminder was sent to him on
the 3rd January 1899.

III In the case of Superintending Engineer,
Rowdantota, for orders, as to charge
amounting to Rs 6,923/- for obtaining
the channels of the tank of which
Rs 2,472 is cost of earthwork —
required

required for re-grading the channels and straightening their banks and the balance for repairing masonry works &c. The Executive Engineer failed to carry out the maintenance work within the 3 years that have elapsed since the Deputy Commissioner was addressed on this subject, and it being inadvisable to allow these important channels to remain any longer in their present unsatisfactory state, I have authorized the Superintending Engineer to have this work carried out under the Maintenance Rules, debiting cost to Revenue Department for recovery as a revenue demand.

IV I request that you will be good as to lay the matter before Government, for such notice as they may wish to take (1) of the neglect of maintenance of these important channels (on the improvement of which Government spent Rs 6,43,000/= when restoring the tank in 1888), (2) of the failure of the Revenue.

Revenue department to enforce the maintenance rules though that neglect was specially brought to the notice of the deputy Commissioner in 1873, and who has not even replied to the reference on the subject, and (3) if the want of interest received by that department in securing the increase of revenue, which after the lapse of 12 years since the canal and channels were improved, is only Rs 10 71/ against about Rs 9000/- anticipated.

I also request that you will be good enough to obtain the sanction of Government to the entertainment of a storeyer on Rs 15/- per mensem, as the same is considered necessary both by the Executive Engineer and Superintending Engineer, for the better conservancy of the channels which are nearly 6 miles long.

I have the honor to be
Sir,
Your most obedient, servant,

W. A. W. Stewart Colvin

Officiating Chief Engineer
& Inspector Genl.
of Irrigation &c.

proposed in para 7 of this Office No.290 dated 19th January last viz, that the P.W.Department be empowered to carry out maintenance work, in cases in which ryots fail to carry out work, after lapse of notice served on them.

I have the honour to be,

Sir

Your most obedient Servant,

Offg. Chief Engineer of Mysore.

assessment of Rs 58/-. The present cultivation is put down as 1.3 acres, yielding a revenue of Rs 67/1/-

4. The tenement is said to be in order, except in few places where it has budged out.

5. The present estimate provides for raising the bund to R.L. 55.00, rebuilding the tenement where it is budged out and repairing the weirs.

6. It has a catchment basin of 0-5 3/4 mile and the present length of weir, viz. 132 ft. is sufficient for discharging with 2 1/2 feet head a run off of 1/2 an inch per hour.

Draft circular to be
submitted to H.E. the Com-
missioner.

Read:- ——————

The following communi-
cations from the Chief Engineer
in Mysore :-

1 Letter No 290 d. 9th January
1891, stating that the Kechur
(Major) tank in the Tumkur
Taluk, which was restored by
Govt at an outlay of Rs 3,330/-
and handed over to the Revenue
Dept in 1889 for future maintenance
by raiyats, was not main-
tained as required by the rules,
and that it being inadvisable
to allow the tank to remain
in its unsafe condition,
the Supdg Engineer was
authorized to carry out the
necessary work at once; and suggesting
that in case in which
raiyats fail or refuse to
carry out maintenance
work to a restored tank,
they be given a certain time
(to be fixed by the Dy Comr)
after

after the lapse of which, steps be at once taken by the D.P.W. to execute the work, debiting the actual outlay to the Revenue Department for recovery as a revenue demand.

(2) Letter No 2217 dated 22nd April 1924, stating that the earth-work required to bring to standard, the bund of the Maudya tank, Reg. No 14, Maudya Taluk, which has been allowed to deteriorate greatly, will be carried out by the P.W.D., as it is absolutely necessary to put the important tank into a state of safety at once, the cost incurred being recovered from the raiyats concerned as a revenue demand.

(3) Letter No 2379 dated 29th April 1924, reporting that an estimate for Rs 6,923/- (including Rs 2,923/-, the cost of earth-work)

bears

2. The deteriorated condition of the tanks has been brought about by the direct neglect of the Rev officers to enforce the maintenance rules for the maintenance of tanks.

These officers, if still in ~~an accountable position in the~~ service, should be called upon by the Dy Comrs concerned to submit their explanations for the orders which should be passed to Govt for ordered.

3. The establishment of a Manager on Rs 150 per mensem for the conservancy of the Bhadravati tanks & channels is sanctioned.
